Choose the Powermax system that best suits your needs based on the thickness of metal you will be cutting, whether it will be done by a handheld torch or with an automated machine, your electrical service, and your compressed gas source.

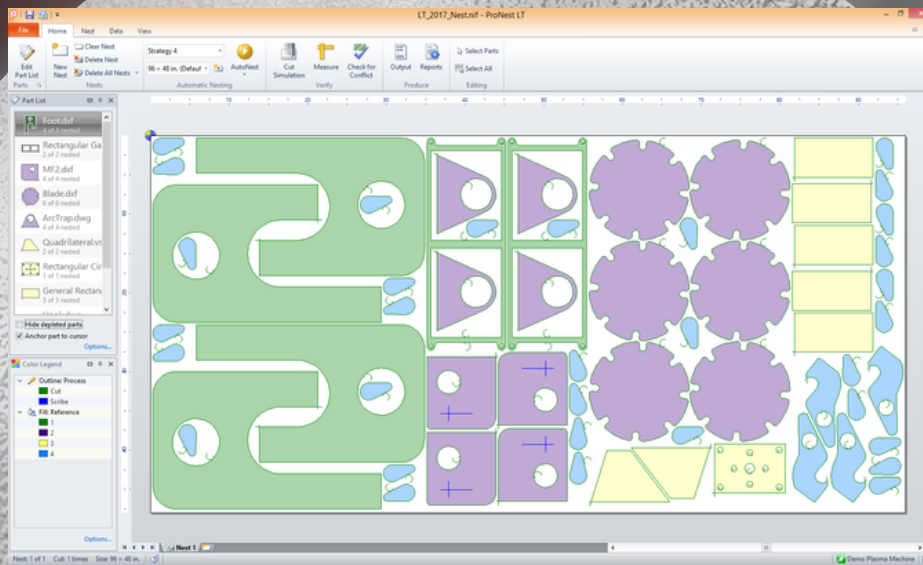

With models like the Powermax30 XP, Powermax45 XP, Powermax65, Powermax85, Powermax105, and Powermax125, you can choose the system that best suits your requirements. These systems offer a wide range of cut capacities, from 3/8" to 1-1/2", and can handle various thicknesses for recommended, severance, and pierce cuts.
